How to Set Up BYOD for Arctic 1.0

Quick Setup (Any DNS Provider)

If you already have a subdomain provider account, follow these simple steps:

1. Go to your FreeDNS account (or any subdomain provider)
2. Create a new **A record** with the IP address: 152.53.38.5
3. Wait for the subdomain to become active (this happens automatically)

Detailed Setup Guide (Using FreeDNS)

Part 1: Create Your FreeDNS Account

1. Visit [FreeDNS](#)
2. Click **Subdomains** in the top-left corner
3. Click the **Sign Up Free** button
4. Fill out the registration form
5. Click **Send activation email**
6. Check your email and follow the activation instructions

Part 2: Set Up Your Subdomain

Once you have an active account:

1. Navigate to the **Subdomains** page
2. Click the **Add** button
3. Select **chickenkiller.com (public)** from the options
4. Choose **Many many more available…**
5. Select **Shared Domain Registry**

Part 3: Configure Your A Record

1. **Choose your subdomain name** (e.g., `ixlmathadminlogin`)
2. **Set Type to:** A
3. **Skip the Domain field** (leave as default)
4. **Set Destination to:** `152.53.38.5`
5. **Skip TTL** (leave as default)
6. **Skip Wildcard** (leave unchecked)
7. **Complete the bot verification** (CAPTCHA)
8. Click **Save**

You're Done!

Your subdomain will automatically become active. Wait a few moments for the DNS to propagate, and your link will be ready to use.
